Shoji Mori

Curriculum Vitae

Institute of Advanced Study, Tsinghua University, Beijing, China

shoji9m@mail.tsinghua.edu.cn | +86 150 1037 8071 | shoji-mori.github.io

Education

Mar. 2019	Ph.D., Department of Earth and Planetary Sciences, Tokyo Institute of Technology (with Associate Prof. Satoshi Okuzumi, Tokyo Institute of Technology)
Mar. 2016	M.S., Department of Earth and Planetary Sciences, Tokyo Institute of Technology (with Associate Prof. Satoshi Okuzumi, Tokyo Institute of Technology)
Mar. 2014	B.S., Department of Earth and Planetary Sciences, Tokyo Institute of Technology (with Assistant Prof. Satoshi Okuzumi, Tokyo Institute of Technology)

Employment

Dec. 2023–present	Shuimu Fellowship, Tsinghua University, China
Apr. 2021–Nov. 2023	JSPS Fellowship, Tohoku University, Japan
Apr. 2019–Mar. 2021	Postdoctoral researcher, The University of Tokyo, Japan
Apr. 2017–Mar. 2019	JSPS Research Fellowship for Young Scientists (DC2), Japan

Awards

Jul. 2023	Shuimu Tsinghua scholar (overseas), Tsinghua University
Jul. 28, 2017	Poster Presentation Award, "47th Summer School on Astronomy and Astrophysics for Young Astronomers"
Jul. 29, 2016	Poster Presentation Award, "46th Summer School on Astronomy and Astrophysics for Young Astronomers"
Jul. 30, 2015	Poster Presentation Award, "45th Summer School on Astronomy and Astrophysics for Young Astronomers"
Aug. 8, 2014	Best Poster Presentation Award, "The 7th meeting on Cosmic Dust"

Review Experience

Referee for *Nature Astronomy*, *The Astrophysical Journal Letters* (ApJL), *The Astronomical Journal* (AJ), *Monthly Notices of the Royal Astronomical Society* (MNRAS), and *Research in Astronomy and Astrophysics* (RAA).

Academic Society

2015–present	The Astronomical Society of Japan
2014–present	Japan Geoscience Union
2013–present	The Japanese Society for Planetary Sciences

Computational Methods and Research Software

- **Method development:** For protoplanetary disks—the gas-and-particle disks where planets form—implemented simulation capabilities that combine gas motion (hydrodynamics and non-ideal magnetohydrodynamics), radiative heat transport, temperature-dependent opacity, and time-dependent ionization; applied them from local regions to whole-disk models.
- **Integrated modeling and observation prediction:** Connected gas-dynamics, dust-evolution, and radiative-transfer calculations into a workflow that converts the physical evolution of a disk into predicted telescope images.
- **Release and reuse:** Released a synthetic-observation pipeline (archived release), whole-disk radiative non-ideal MHD datasets, and analysis code, enabling verification and reuse of the simulation results.

Mentoring and Teaching

Student Mentoring

2021–present	Katsushi Kondo (Ph.D. student, Institute of Science Tokyo), co-supervised with Prof. Satoshi Okuzumi (Institute of Science Tokyo)
2021–present	Haruhi Enomoto (Ph.D. student, Institute of Science Tokyo), co-supervised with Prof. Satoshi Okuzumi (Institute of Science Tokyo)
2024–present	Yu Wang (Ph.D. student, Tsinghua University), mentored with Prof. Chris Ormel
2024–Jul. 2025	Dawei Dai (undergraduate student, Tsinghua University; now M.S. student, Dartmouth College), co-supervised with Associate Prof. Masahiro Ogihara (Tsung-Dao Lee Institute)

Teaching

Apr.–Sep. 2023	Part-time Lecturer, Physics, National Institute of Technology, Ichinoseki College
2016	Teaching assistant, Computational Planetary Science, Tokyo Institute of Technology
2014	Teaching assistant, Computational Planetary Science, Tokyo Institute of Technology

Computational Training

Taught hydrodynamic-simulation workflows and troubleshooting at a national computational-fluid-simulation workshop; supported students and collaborators in model setup, debugging, visualization, data analysis, and physical interpretation.

Outreach Activity

Oct. 8–9, 2016	School festival in Tokyo Institute of Technology; S. Mori, short talk, "Toward the understanding of planet formation process"; S. Mori, web development

Research Grants

JSPS Research Fellowship for Young Scientists (DC2)

Project title	"A new model of magnetohydrodynamic turbulence and dust evolution in protoplanetary disks considering electron heating"
Period	Apr. 26, 2017–Mar. 31, 2019
Total amount	1,900,000 JPY (Direct cost: 1,900,000 JPY)
PI	Shoji Mori

JSPS Research Fellowship for Young Scientists (PD)

Project title	"Formation process of Earth-like planets revealed by magnetohydrodynamic simulations of protoplanetary disks"
Period	Apr. 28, 2021–Mar. 31, 2024
Total amount	5,200,000 JPY (Direct cost: 4,000,000 JPY; Indirect cost: 1,200,000 JPY)
PI	Shoji Mori

Grant-in-Aid for Early-Career Scientists, JSPS

Project title	"Dust dynamics in protoplanetary disks explored through magnetohydrodynamic simulations"
Period	Apr. 1, 2022–Mar. 31, 2025
Total amount	4,030,000 JPY (Direct cost: 3,100,000 JPY; Indirect cost: 930,000 JPY)
PI	Shoji Mori

2021 Tohoku University–Tsinghua University Collaborative Research Fund Supported Projects

Project title	"Protoplanetary disks and formation of terrestrial planets"
Period	Apr. 2021–Mar. 2023
Total amount	4,000,000 JPY
PI	Kengo Tomida, Xuening Bai
Co-I	Shoji Mori, Hidekazu Tanaka, Chris Ormel, Zhuo Chen

Presentations

Invited Talks

- "Magnetohydrodynamic Evolution of Young Disks and Planet-Formation Environments", Missing Links in Planet Formation: From Embedded Disks to Planets, Nov. 9–13, 2026, Taipei, Taiwan (scheduled).
- "Magnetized Protoplanetary Disks", SPiCE: Simulating Physics in Celestial Ecosystems, Mar. 18–22, 2024, Sendai, Japan.
- "Radiative Nonideal MHD Simulations of Inner Protoplanetary Disks", Magnetohydrodynamical Flows in Young Circumstellar Disks, Oct. 1–5, 2023, Kreuth, Germany.
- "Numerical Simulations of Protoplanetary Disks to Elucidate Planet Formation Processes: Current Status and Future Prospects", CfCA Users Meeting 2022, Jan. 26, 2023, Tokyo, Japan.
- "Evolution of the Water Snowline in Magnetized Protoplanetary Disks", Building Blocks of Planets 2020, Apr. 14–17, 2020, Online.

Contributed Talks

International

- "Ionization, Radiation, and MHD in Protoplanetary Disks", Extra Dimensions in Planet Formation, Oct. 2025, Izu, Japan.
- "Temperature Structure and Its Evolution of Magnetized Protoplanetary Disks", Exoplanets & Planet Formation Workshop 2025, Aug. 24–29, 2025, Kunming, China.
- "Magnetic Circumplanetary Disks", Circumplanetary Disks and Satellite Formation III, Jan. 27–31, 2025, Kyoto, Japan.
- "Physical Interpretation of Line Observations of Envelope and Disk Systems: A Case of L1527", ALMA workshop 2019: Early Planet Formation in Embedded Disks, Dec. 8–10, 2019, Tokyo, Japan.
- "Evolution of the Water Snowline in Magnetized Protoplanetary Disks", PLANET FORMATION WORKSHOP 2019, Nov. 25–28, 2019, Mitaka, Japan.
- "Inefficient Magnetic Accretion Heating in Protoplanetary Disks", Ringberg Workshop: Turbulence and Structure Formation in Protoplanetary Disks 2019, Jul. 8–12, 2019, Kreuth, Germany.
- "Inefficient Magnetic Accretion Heating in Protoplanetary Disks", From Stars to Planets II – Connecting our understanding of star and planet formation, Jun. 17–20, 2019, Gothenburg, Sweden.
- "Inefficient Heating by Wind-driven Accretion in Protoplanetary Disks", Japanese–German Meeting on Exoplanets and Planet Formation, Sep. 24–28, 2018, Edesheim, Germany.
- "Wind-driven Accretion in Circumplanetary Disks", Planetary and Satellite System Workshop 2019, Sep. 24–26, 2019, Tanegashima, Japan.
- "Suppression of MRI Turbulence by Electron Heating in Protoplanetary Disks", 4th Session of the Sant Cugat Forum on Astrophysics, Apr. 18–22, 2016, Sant Cugat, Spain.
- "The Effect of Electron Heating on Magnetorotational Turbulence in PPDs: Self-Regulation and Reduced Turbulence Strength", Protoplanetary Disk Dynamics and Planet Formation, Sep. 29–Oct. 2, 2015, JAMSTEC, Kanagawa, Japan.
- "Electron Heating and Suppression of Magnetorotational Turbulence in Protoplanetary Disks", 3rd DTA Symposium, Jun. 1–4, 2015, National Astronomical Observatory of Japan, Tokyo, Japan.

Domestic

- "Conditions for Asymmetric Disk Winds in Protoplanetary Disks: Radiative Nonideal MHD Simulations", The Astronomical Society of Japan Autumn Meeting 2026, Sep. 8, 2026, Okayama, Japan.
- "Global Nonideal MHD Simulations of Protoplanetary Disks: Episodic Surface Accretion", The Astronomical Society of Japan Autumn Meeting 2025, Sep. 9–11, 2025, Shimonoseki, Japan.
- "Long-term Thermal Evolution of Magnetized Protoplanetary Disks with Mass Loss: Impact on Super-Earth Formation", The Japanese Society for Planetary Sciences Autumn Meeting 2024, Sep. 24–26, 2024, Fukuoka, Japan.
- "Thermal Structure of Inner Magnetized Disks: Radiative Nonideal MHD Simulations", The Astronomical Society of Japan Autumn Meeting 2023, Sep. 20–22, 2023, Nagoya, Japan.
- "Temperature Structure from Global Nonideal MHD Simulations of Protoplanetary Disks", The Astronomical Society of Japan Autumn Meeting 2022, Sep. 15, 2022, Niigata, Japan.
- "Temperature Structure of Magnetized Protoplanetary Disks from Global Nonideal MHD Simulations", The Japanese Society for Planetary Science 2022 Fall Meeting, Sep. 20, 2022, Ibaraki, Japan.
- "Temperature Structure from Global Nonideal MHD Simulations of Protoplanetary Disks", Planet Formation Debate 2022 Spring, Mar. 23–25, 2022, Sendai, Japan.
- "Modeling Magnetic Circumplanetary Disks: Wind-driven Accretion Regions", The Astronomical Society of Japan Autumn Meeting 2021, Sep. 9, 2021, Online.
- "Mock Observations of Rotating Infalling Envelopes: Re-analysis of L1527 Observations", The Astronomical Society of Japan 2021 Spring Meeting, Mar. 4, 2021, Online.
- "Magnetic Accretion and Snowline Migration in Protoplanetary Disks", The Japanese Society for Planetary Sciences Autumn Meeting 2020, Nov. 12, 2020, Online.
- "Mock Observations of Rotating Infalling Envelopes Based on Hydrodynamics: Estimating Central Stellar Mass", The Astronomical Society of Japan 2020 Autumn Meeting, Sep. 9, 2020, Online.
- "SPICA Observation of Water Emission Reveals Thermal and Dynamical Structures of Protoplanetary Disks", The Astronomical Society of Japan 2020 Spring Meeting, Mar. 16–19, 2020, Online.
- "Evolution of the Snowline in Magnetically Accreting Disks: Implications for Terrestrial Planet Formation", JSPS Grant-in-Aid Star and Planet Formation 2020 Large Meeting, Sep. 30–Oct. 3, 2020, Online.
- "Inefficient Accretion Heating in Protoplanetary Disks: Influence on Evolution of Snow Line", Japan Geoscience Union Meeting 2019, May 26–30, 2019, Chiba, Japan.
- "Temperature Profile Depending on Nonideal Magnetohyodrodynamic Effects in Protoplanetary Disks", The Astronomical Society of Japan 2018 Fall Meeting, Sep. 21, 2018, Himeji, Japan.
- "Magnetohydrodynamic Simulation for Temperature Structure of Circumplanetary Disks", Planetary formation debate: from protoplanetary disk to giant impact, Sep. 10–11, 2018, Sendai, Japan.
- "Accretion Heating in Protoplanetary Disks based on MHD Simulations", The Japanese Society for Planetary Science 2017 Fall Meeting, Sep. 27–30, 2017, Toyonaka, Japan.
- "Heating Gas in Magnetic-Wind-Driven Accretion Disks", Yukawa Institute Conference "Protoplanetary Disk", Jul. 10–12, 2017, Kyoto, Japan.
- "Suppression of Magnetic Turbulence by Electron Heating in Protoplanetary Disks: Validation by MHD Simulation", The Astronomical Society of Japan 2017 Spring Meeting, Mar. 15, 2017, Fukuoka, Japan.
- "Suppression of Magnetic Turbulence by Electron Heating in Protoplanetary Disks", The Japanese Society for Planetary Science 2016 Fall Meeting, Sep. 12–14, 2016, Okayama, Japan.
- "Suppression of Magnetic Turbulence by Electron Heating in Protoplanetary Disks: Validation by MHD Simulation", The Astronomical Society of Japan 2016 Spring Meeting, Mar. 14–17, 2016, Hachioji, Japan.
- "Gravitational Instability Induced by Suppressing Turbulence by Electron Heating: The Effect of Stellar X-Rays", The Japanese Society for Planetary Science 2015 Fall Meeting, Oct. 14–16, 2015, Tokyo, Japan.
- "Gravitational Instability Induced by Suppressing Magnetic Turbulence by Electron Heating", The Astronomical Society of Japan 2015 Fall Meeting, Sep. 9–11, 2015, Kobe, Japan.
- "Gravitational Instability Caused by Suppressing Magnetic Turbulence by Electric-Field Heating", Japan Geoscience Union Meeting 2015, May 24–28, 2015, Chiba, Japan.
- "Suppressing MRI Turbulence by Electric-Field Heating of Electrons", Grant-in-Aid for Scientific Research on Innovative Areas Exoplanets Group B01,B02 Meeting, Feb. 16–17, 2015, Tokyo, Japan.
- "Electric Field Heating of Plasma in Magnetic Turbulence: Effects on Turbulence Strength and Dust Growth", The Japanese Society for Planetary Science 2014 Fall Meeting, Sep. 24–26, 2014, Sendai, Japan.
- "Amplifying Ohmic Dissipation by Developed Magnetic Turbulence in Protoplanetary Disks", The Astronomical Society of Japan 2014 Fall Meeting, Sep. 11–13, 2014, Yamagata, Japan.

- “Electron Heating and Decreasing of Ionization Fraction by Magnetic Turbulence in Protoplanetary Disks”, 2014 44th Summer School on Astronomy and Astrophysics for Young Astronomers, Jul. 28–31, 2014, Chikuma, Japan.
- “Dead Zones by Electric-Field Heating in Protoplanetary Disks”, Japan Geoscience Union Meeting 2014, Apr. 28–May 2, 2014, Yokohama, Japan.

Poster Presentations

International

- “Thermal Structure of Magnetized Protoplanetary Disks and Its Implications for Planet Formation”, International Conference on Exoplanets and Planet Formation, Dec. 8–12, 2025, Shanghai, China.
- “Temperature Structure of Magnetized Protoplanetary Disks”, Exoplanets & Planet Formation Workshop 2023, Dec. 16–19, 2023, Beijing, China.
- “Nonideal MHD Simulations to Understand the Temperature Structure of Protoplanetary Disks”, SPIDI: The Inner Disk of Young Stars: Accretion, Ejection, and Planet Formation, May 7–13, 2023, Cargèse, France.
- “Radiative Nonideal MHD Simulations of the Inner Protoplanetary Disks”, Protostars and Planets VII, Apr. 10–15, 2023, Kyoto, Japan.
- “Evolution of the Water Snowline in Magnetized Protoplanetary Disks”, EXTREME SOLAR SYSTEMS IV, Aug. 19–23, 2019, Reykjavik, Iceland.
- “Efficiency of Viscous Heating in Circumplanetary Disks”, Circumplanetary Disks and Satellite Formation, Mar. 26–30, 2018, Nagoya, Japan.
- “Heating by Wind-driven Accretion in PPDs: Snowline Controlled by Hall Effect”, Japan–Germany planet & disk workshop, Sep. 25–30, 2016, Ishigaki Island, Japan.
- “Suppression of Magnetic Turbulence by Electron Heating in Protoplanetary Disks”, Exoplanets and Disks: Their Formation and Diversity III, Feb. 21–24, 2016, Ishigaki Island, Japan.
- “Plasma Heating by MRI-induced Electric Fields and Its Effect on Dust Growth in Protoplanetary Disks”, Japan–German Meeting, Nov. 4–7, 2014, Heidelberg, Germany.
- “Interplay between dust and MHD turbulence in protoplanetary disks: electric-field heating of plasmas and its effect on the ionization balance of dusty disks”, The 7th meeting on Cosmic dust, Aug. 4–8, 2014, Osaka, Japan.

Domestic

- “Efficiency of Accretion Heating in Circumplanetary Disks”, Satellite system workshop, Aug. 30–31, 2018, Meguro, Japan.
- “Temperature Structure of Weakly Ionized Protoplanetary Disks”, Japan Geoscience Union Meeting 2018, May 20–24, 2018, Chiba, Japan.
- “Snowline depending on MHD structure in Protoplanetary Disks”, 47th Summer School on Astronomy and Astrophysics for Young Astronomers, Jul. 25–28, 2017, Chikuma, Japan.
- “Position of Snow Line Depending on Spatial Distribution of Magnetorotational Instability in Protoplanetary Disks”, Japan Geoscience Union Meeting 2017, May 21–25, 2017, Chiba, Japan.
- “Supression of Magnetic Turbulence by Electron Heating in Protoplanetary Disks”, 2016 46th Summer School on Astronomy and Astrophysics for Young Astronomers, Jul. 26–29, 2016, Chikuma, Japan.
- “Electron Heating by Strong Electric Field Induced by Magnetic Turbulence and Its Effect on Protoplanetary Disks”, The Astronomical Society of Japan 2016 Spring Meeting, Mar. 14–17, 2016, Hachioji, Japan.
- “Effects of Electron Heating on Protoplanetary Disks”, 2015 45th Summer School on Astronomy and Astrophysics for Young Astronomers, Jul. 27–30, 2015, Chikuma, Japan.
